About Us

公司介绍 京姿® Company Profile

Tianjin Jingzi Technology Development Co., Ltd., headquartered in Tianjin Binhai New Area, has specialized in one-stop MRO industrial procurement services for 16 years. With nationwide shared warehouse networks covering all product categories, the company has served over 1,000 state-owned enterprise projects, establishing a solid foundation for overseas exports. Leveraging its proprietary procurement platform, it has built a fully digitalized production-distribution system featuring more than 100,000 SKUs across hardware, personal protective equipment, electrical components, and other categories to meet diverse procurement needs. Operating from its Tianjin headquarters with branches in Qingdao, Rizhao, and Dalian international logistics hubs, the company utilizes shared warehouses and global logistics networks. Holding AEO certification and over a decade of customs clearance expertise, it demonstrates significant advantages in food and steel product clearance. Its comprehensive maritime network covers all four major ports and routes, offering flexible container consolidation solutions and full-chain services including FOB/CIF pricing. With established routes to the Middle East and Southeast Asia, the company serves over 10,000 clients with annual exports exceeding 80,000 TEUs. Services encompass HS code classification, cost estimation, and end-to-end container logistics support.

团队介绍 Team Introduction

Purchasing Team

- Meet customer needs (e.g., ELSEWEDY ELECTRIC)
- Specify product specifications, quantity, and delivery requirements
- Review key terms in the quotation
- Coordinate with suppliers for product confirmation and price negotiations

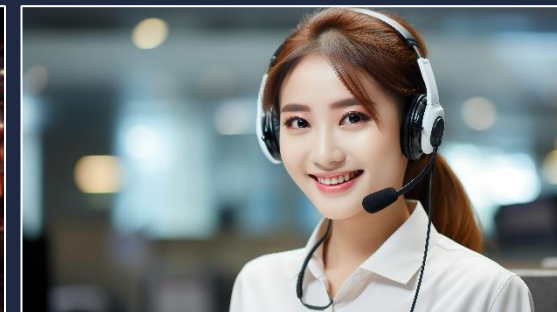

Logistics Team

- Arrange transportation via FOB port, coordinate freight forwarders to complete export customs clearance and sea freight booking.
- Track shipment status and ensure delivery within 7-15 business days

Quality Inspection Team

- Verify whether the product complies with international standards (e.g., technical parameters of TRACTEL brand hydraulic equipment)
- Handling quality disputes after delivery

Through years of accumulation and sincere collaboration, this is a highly combat-effective team!

Technical Team

- Assist the procurement team in confirming technical parameters
- Provide alternatives

After-sales service team

- As the only customer contact point, track order progress in real time
- Handle special requirements

Company Development History

On April 28, Tianjin Jingzi Technology was officially established.

2018

On January 24, a framework agreement for the 2023 Tianjin Municipal Temporary Electrical Materials Joint Centralized Procurement was signed with China Construction Communications Construction Group Co., Ltd.

2024

2023

In November, the company was awarded a contract for sporadic material procurement from China Railway Urban Construction Group Building Technology Co., Ltd.

2023

On August 22, the bid was awarded to China Construction E-Commerce Co., Ltd. for sporadic material procurement in the Beijing-Tianjin-Hebei region.

On January 26, a sporadic material contract was signed with China Construction Eighth Engineering Bureau Co., Ltd.

2024

2025

On May 23, we collaborated with China Construction Sixth Engineering Bureau Co., Ltd. on the environmental protection inspection and rainwater-sewage separation renovation project in Binhai New Area.

2025

Obtained system certification certificates in August (Quality Management System Certification Certificate, Environmental Management System Certification Certificate, Occupational Health and Safety Management System Certification Certificate)

2025

China Construction Shares has been awarded the contract for 19 regional projects including centralized procurement of miscellaneous materials for the 2025-2026 fiscal year.

2024

On August 20, a temporary construction materials contract was signed with the Infrastructure Branch of China Construction Second Engineering Bureau Third Company for the cavern and road works during the preparatory phase of the Liaoning Zhuanghe Pumped Storage Power Station.

核心优势 Core strengths

Dual Major Core Competencies

With comprehensive domestic resources covering all categories of construction materials, we possess full-process capabilities for foreign trade agency operations and professional customs clearance qualifications for building materials. Our expertise includes foreign trade regulations, customs clearance procedures, and industry-specific characteristics.

Rapid emergency response

To address urgent demands in the construction industry, a 7×24-hour emergency response mechanism has been established, prioritizing emergency orders, expedited applications, and accelerated approvals to ensure full compliance with project timelines.

Strong category compatibility

Specializing in solving cross-border challenges for multi-category, small-batch, and complex materials, we possess extensive experience in HS code classification for construction supplies. Our documents achieve high approval rates and low inspection rates, ensuring smoother customs clearance processes.

Cost transparency and controllability

The fee structure is transparent and open, with no hidden charges; comprehensive costs are reduced through centralized customs clearance and integrated logistics, with regular cost analysis reports issued.

Efficient compliance closed loop

Establish a closed-loop service system covering product selection and procurement, goods inspection and packing, customs declaration and clearance, financial and tax compliance, as well as logistics distribution. The entire process ensures full compliance with regulatory requirements, effectively mitigating various operational risks.

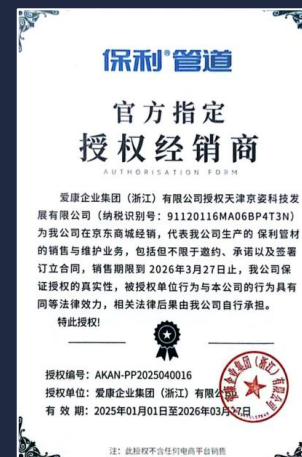

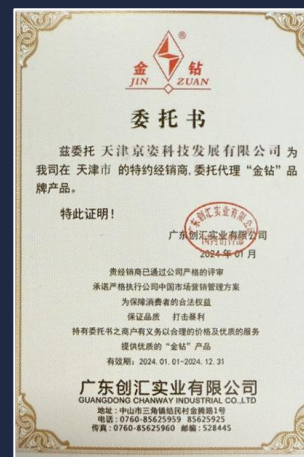

The team has strong resources

With 16 years of dedicated experience in the construction foreign trade industry, we are equipped with a professional compliance advisory team. Through long-term strategic partnerships with multiple ports, customs authorities, and logistics enterprises, we can coordinate premium resources to ensure service efficiency and quality.

企业资质 qualification

现代化企业 工业品一站式采购平台 Industrial Products Centralized Procurement

A photograph of two men in business suits sitting at a table. The man on the left is wearing glasses and a red tie, looking down at a tablet. The man on the right is smiling and holding a pen. A laptop and a glass of water are on the table. The background is a bright window with a city view.

Part 02

Business Introduction

Tianjin Jingzi Technology

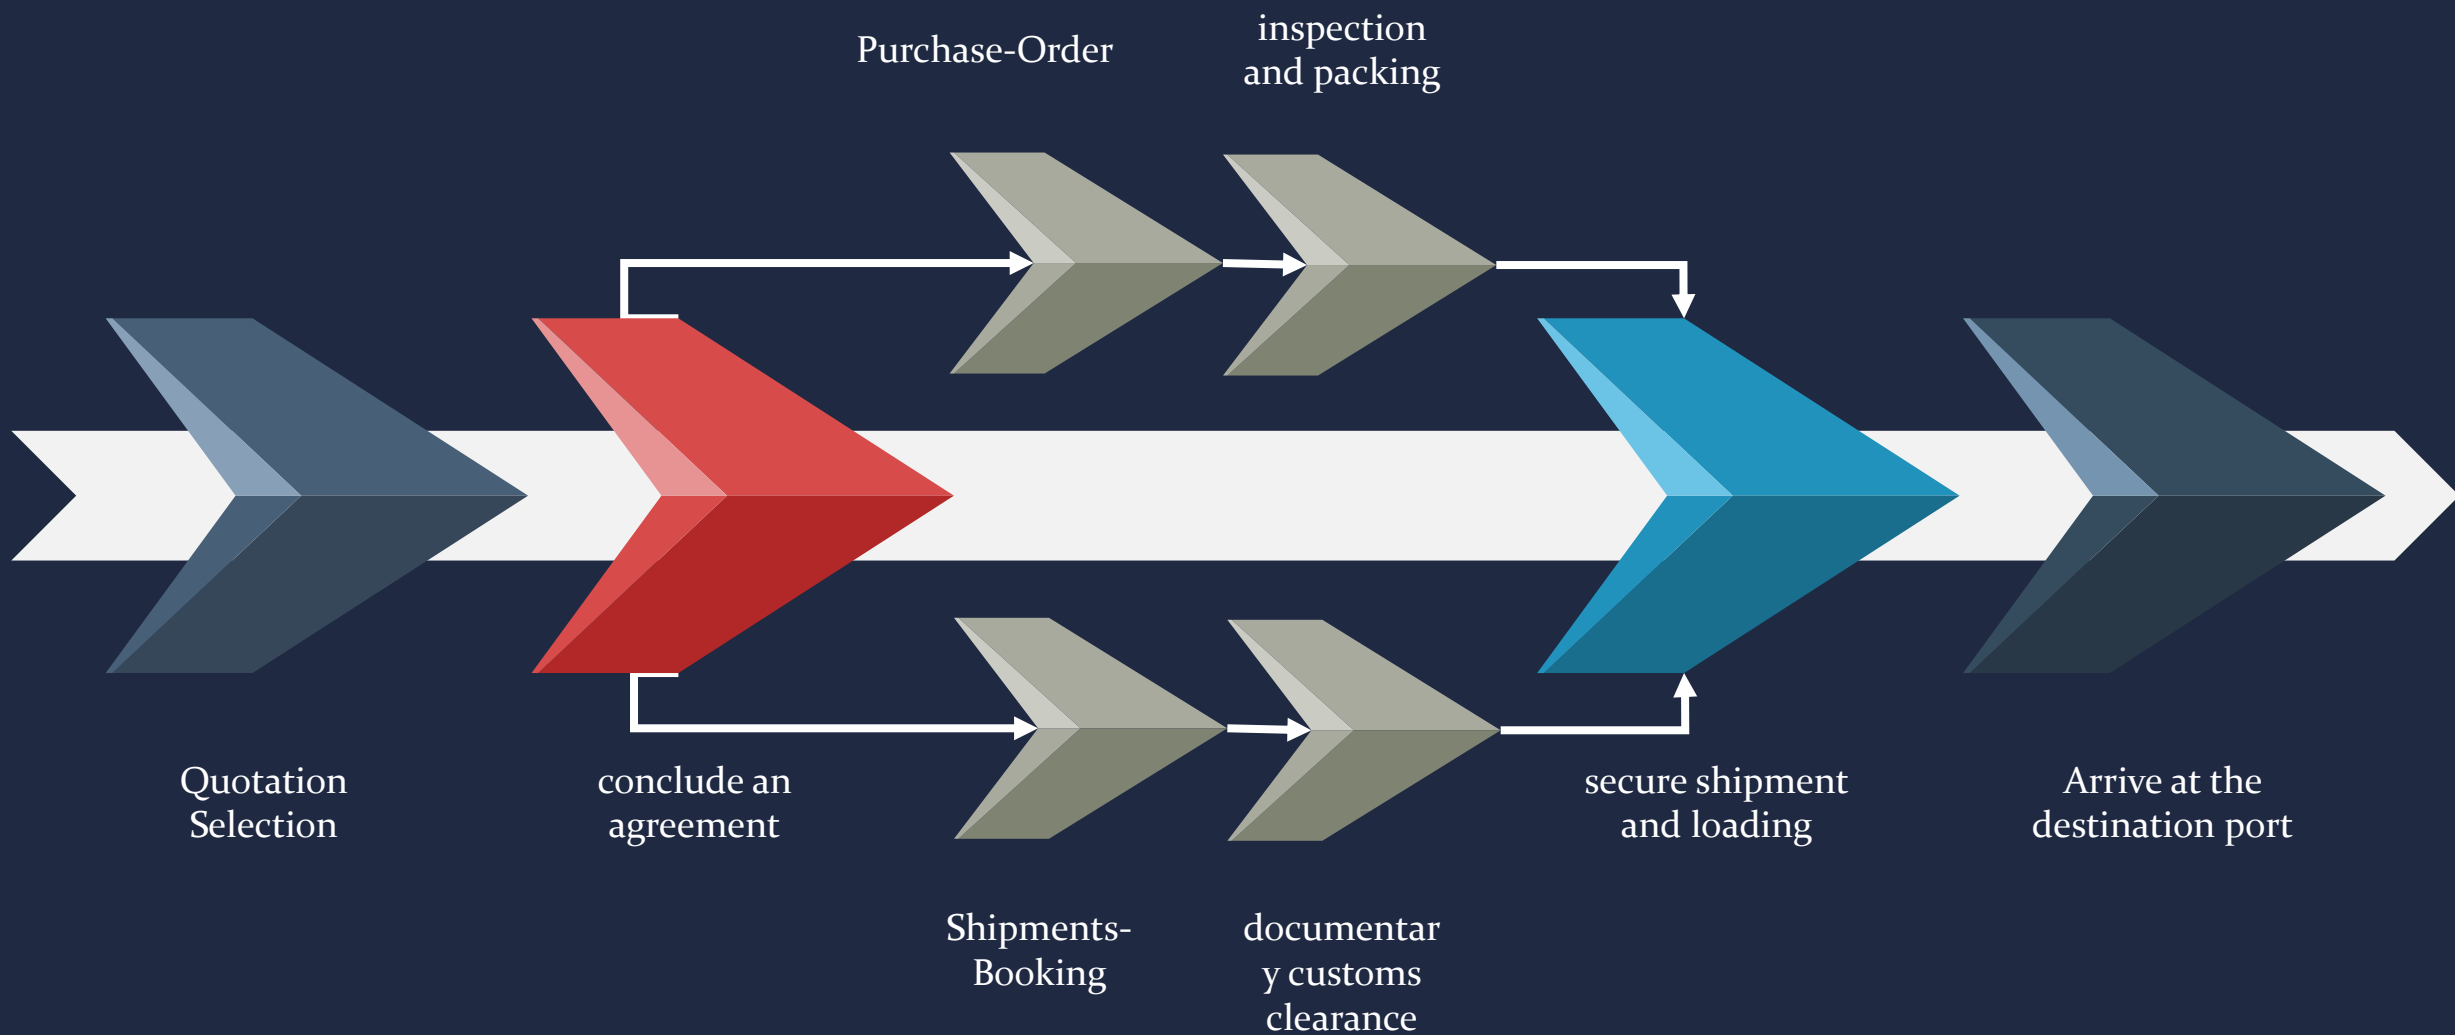

is rooted in the Beijing-Tianjin-Hebei region, specializing in the domestic MRO industrial products and construction materials supply chain, serving key engineering and industrial clients across North China and nationwide. Leveraging 16 years of industry resources, it offers one-stop procurement for 15 major categories and over 100 secondary categories, optimizing product selection, fulfillment, and inventory management through a digital platform to provide compliant and efficient supply services for central state-owned enterprises and local businesses. Focusing on engineering sites and manufacturing scenarios, it strengthens local warehousing and rapid delivery, continuously enhancing supply chain stability and cost advantages to become a leading comprehensive industrial materials service provider in China. The company targets overseas markets under the Belt and Road initiative, specializing in cross-border industrial product supply and full-process foreign trade services, covering regions such as Southeast Asia, Africa, and the Middle East. It provides one-stop solutions for overseas engineering and industrial projects, ranging from bill of lading sorting and procurement integration to customs clearance, logistics, and customs clearance, excelling in exporting diverse, small-batch complex materials. With professional HS code classification, overseas forward warehouses, and local customs coordination, it ensures efficient project material delivery. Capitalizing on domestic supply chain advantages, it supports China's engineering and equipment exports, becoming a reliable cross-border material partner for overseas projects.

业务分布 Business distribution

- MRO Global Exports, CIF One-Stop Service
- We maintain full control throughout the journey from the factory to the destination port.
- 20 Years of Escorting Over 50,000 Industrial Products to Safe Arrival at Port

An aerial photograph of a city at sunset. The sun is low on the horizon, casting a warm, golden glow over the city and the surrounding landscape. The sky is filled with soft, wispy clouds. The city below is densely packed with buildings and trees, with some taller structures standing out. The overall mood is peaceful and hopeful.

Part 04
look forward to the future

未来规划与展望 Future planning and outlook

In the future, Tianjin Jingzi Technology will continue to deepen its expertise in MRO industrial products and construction material supply chains, digitally upgrading the entire procurement process and optimizing intelligent warehousing and cross-border service capabilities. Leveraging the geographical advantages of the Beijing-Tianjin-Hebei region, it will focus on overseas markets under the Belt and Road initiative, expanding business operations in Southeast Asia, Africa, and the Middle East. Adhering to a dual-driven strategy of comprehensive one-stop supply and professional foreign trade agency services, the company aims to enhance supply chain efficiency and service quality, establishing itself as a leading domestic and globally collaborative industrial product supply chain service provider to create greater value for engineering and industrial clients.

Tianjin Jingzi Technology – your global supply chain partner, delivering seamless cross-border solutions with efficient worldwide delivery

Thanks
