Focus

我们是一支专业的团队。我们的成员拥有多年的工程研发、生产装配、网络营销、国际售后专业技术背景，是来自各知名公司的一群精英。

We are a professional team. Our members have many years of professional technical background in engineering research and development, production and assembly, network marketing, and international after-sales, and are a group of elites from various well-known companies.

我们是一支年轻的团队。我们的平均年龄仅有28岁，充满了朝气和创新精神。

We are a young team with an average age of only 28, full of vigor and innovative spirit.

我们是一支专注的团队。我们坚信，博易创的品牌源自客户的信任。只有专注，才能塑造有口皆碑的品牌。

We are a dedicated team. We firmly believe that the Boyichuang brand comes from the trust of customers. Only by focusing can we create a well-known brand.

我们是一支有梦想的团队。我们来自五湖四海，因为一个共同的梦想：做一家让德国人认可的万能平板打印机企业。

We are a team with dreams. We come from all corners of the world, because of a common dream: to be a universal flatbed printer company recognized by Germans.

企业理念(Team Introduction)

做数码打印机领跑者

Become a leader in digital printers

发展历程(Development Course)

2001

■ 2001-2003

广兴工作室成立, 专门研究物体表面打印

Guangxing Studio was established to specialize in surface printing.

2009

■ 2009

深圳办事处成立

Shenzhen branch was established.

2011

■ 2011

广州办事处成立
上海办事处成立

Shanghai and Guangzhou branches were established.

2021

■ 2021

不断学习改进
现有产品进行
研究开发新的
模型

Continuously learn to improve existing products and conduct research and development of new models.

2003

■ 2003-2006

博易创研究所研发的第一台高温瓷像机面世

BYC Research Institute develops the first high-temperature ceramic printer.

2006

■ 2006

昆明博易创科技开发有限公司成立

KMBYCTechnology Development Co., Ltd. was established.

2016

■ 2016.12

深圳办事处升级成研发与主打产品制造中心

Shenzhen office upgraded to R&D and flagship product manufacturing center.

2006

2006年9月

公司成立，第一台万能打印机在中国诞生

September 2006

The company was established and the first universal printer was born in China

2007

2007年

“博易创”打印机首次出口海外

Since 2007

"KMBYC" printer is exported overseas for the first time

2009

2009年

“博易创”打印机销往海外100多个国家和地区

Since 2009

"KMBYC" printer started foreign trade

2011

2011年

全行业唯一日本人代理中国品牌“博易创”打印机

In 2011

The only Japanese agent in the industry for the Chinese brand "KMBYC" printer

2017

2017年3月

博易创小型A4机研发生产成功

March 2017

KMBYC successfully developed and produced a small A4 printer

2021

2021年

在中国率先推出ONE-PASS高速UV打印机

Since 2021

The first to launch One-pass high-speed UV printer in China

技术资源(Technology Resources)

坚持自主研发，申请多个国家专利。特别是档案盒打印机70年不掉色不变色，国内外各级政府指定专用机型。

We insist on independent research and development and apply for patents in many countries. In particular, the file box printer will not fade or change color for 70 years, and it is a special model designated by governments at all levels at home and abroad.

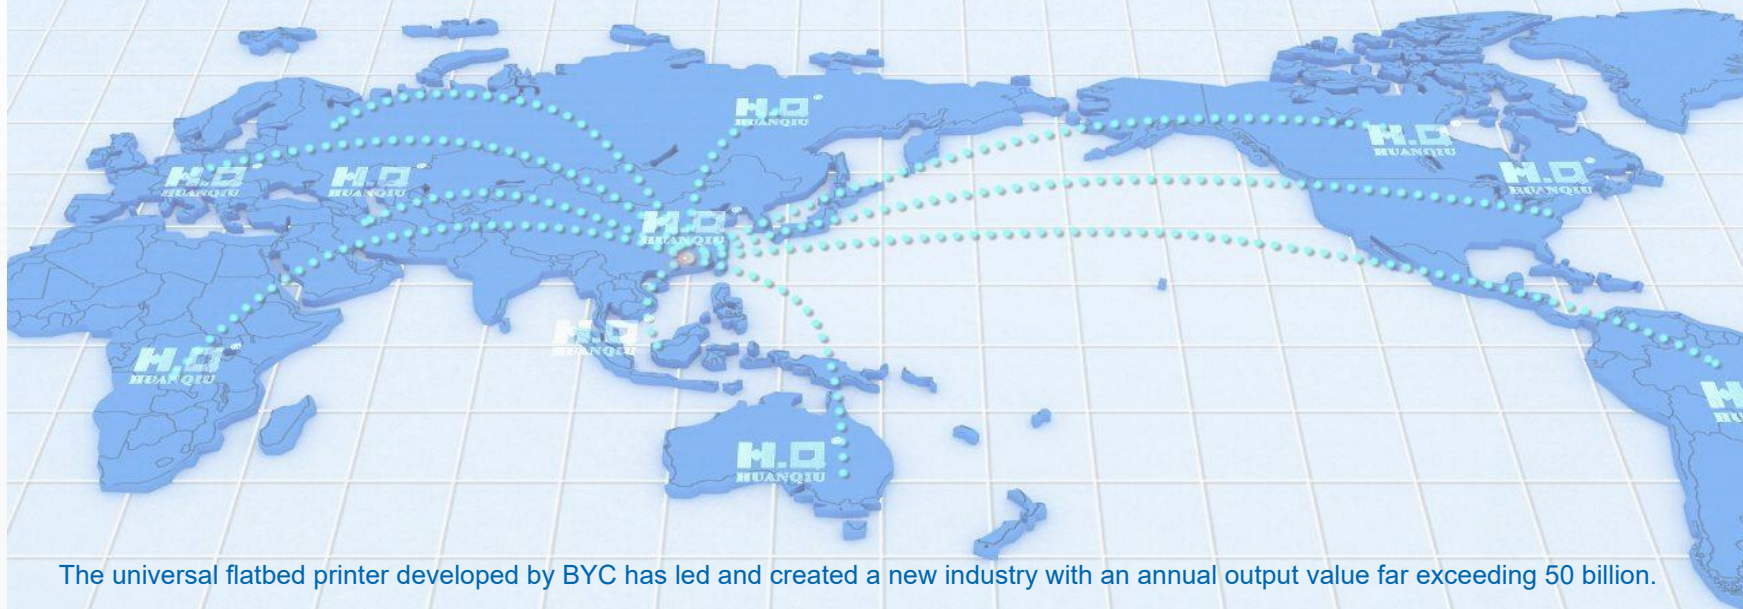

博易创是唯一拥有自主研发专用墨水、打印不降速、白彩同出、全新原装喷头、全新自研主板与控制程序、整体设计制造六项全能的万能平板打印机的行业标杆企业。

BYC is the only industry benchmark company that has six all-round flatbed printers, including self-developed special ink, printing without speed reduction, white and color output, brand new original print head, brand new self-developed motherboard and control program, and overall design and manufacturing.

博易创研发的万能打印机引领并开创了一个全新行业，年产值远超500亿，为全国乃至全球各国政府解决数十万就业岗位，成就了一大批企业家的财富梦，缔造了物体表面打印的全新时代。

The universal flatbed printer developed by BYC has led and created a new industry with an annual output value far exceeding 50 billion. It has created hundreds of thousands of jobs for governments across the country and even the world, fulfilled the wealth dreams of a large number of entrepreneurs, and created a new era of surface printing.

我们的优势(Our Advantage)

2003年申请专利，解决单件物品不制版、渐变色不能丝印问题。

为全国乃至全球各国政府解决数十万就业岗位，成就了一大批企业家的财富梦，缔造了物体表面打印的全新时代；

优势：

- 1、主结构使用十年不变形，更大程度保证了打印平台不变形。
- 2、打印精度高；博易创打印机的图像尺寸精度准确性，误差0.1mm以内。
- 3、轻松实现低于1mm内的高精度字体打印，满足市场高端客户的需求；
- 4、全球售后服务；一对一进行售后技术培训和日常维护指导，让客户无需担心售后问题。

In 2003, the patent was applied to solve the problem that single items cannot be plated and gradient colors cannot be silk-screened.

It has solved hundreds of thousands of jobs for governments across the country and even the world, achieved the wealth dreams of a large number of entrepreneurs, and created a new era of surface printing of objects;

Advantages:

1. The main structure does not deform after ten years of use, which guarantees that the printing platform does not deform to a greater extent.
2. High printing accuracy: the image size accuracy of BYC printers is within 0.1mm.
3. Easily achieve high-precision font printing within 1mm to meet the needs of high-end customers in the market;
4. Global after-sales service: one-to-one after-sales technical training and daily maintenance guidance, so that customers do not need to worry about after-sales problems.

公司产品

ENTERPRISE PRODUCTS

■ 产品定位 Product

数码无版彩色喷墨打印机
Digital plate-free color inkjet printer

■ 市场定位 Market

小批量图案定制的礼品、包装印刷市场
Small batch custom pattern gift and packaging printing market

■ 客户定位 Customer

各种小批量打印需求企业
Businesses with various small-batch printing needs

热销产品(Hot Product)

数码直喷平板打印机系列 Digital Direct Inkjet Flatbed Printer Series

食品打印机 Food printer

使用食用墨水在饼干、糕点、糖果、蛋糕表面直接打印彩色图案。

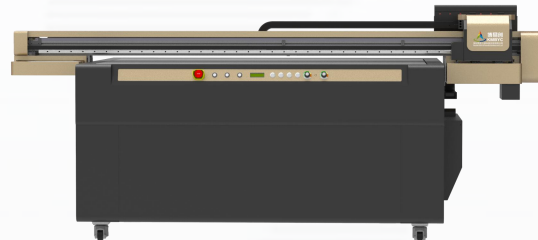

To print colorful patterns directly on the surface of biscuits, pastries, candies and cakes by edible ink.

纺织打印机 Textile printer

使用纺织墨水在棉布、帆布等纺织品表面直接打印彩色图案。

Print colorful design directly on cotton, canvas and other textile surfaces by textile ink.

UV打印机 UV printer

使用UV油墨在玻璃、金属、亚克力、陶瓷等产品表面打印彩色图案。

Print colorful design directly on glass, metal, acrylic, ceramic and other product surfaces by UV ink.

主打产品(Flagship Product)

深圳易龙三维科技开发有限公司
Shenzhen YiLong 3D technology development Co.,Ltd

数码直喷ONE-PASS打印机系列 Digital Direct Inkjet One-pass Printer Series

纸杯/纸碗打印机
Paper cup/bowl fan printer

最小的one-pass打印机型：30cm宽度自动送料，21cm的最大印宽，适合各个尺寸的纸杯片材打印。还可用于信封、餐巾纸、小纸袋的批量打印。
The smallest one-pass printer: 30cm wide automatic feed, 21cm max print width, suitable for printing on paper cups of various sizes. It can also be used for batch printing on envelopes, napkins, and small paper bags.

纸袋/纸盒打印机
Paper bag/box fan printer

常规款one-pass打印机型：80cm宽度自动送料及纠偏功能，适合各种尺寸的纸袋，无纺布袋和纸盒、纸箱的批量打印。
Conventional one-pass printer model: 80cm width automatic feeding and web correction function, suitable for batch printing of paper bags, non-woven bags, paper boxes and cartons of various sizes.

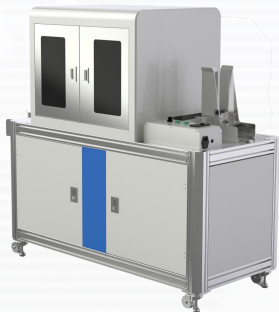

纸箱/胶合板打印机
Corrugated/plywood printer

工业款one-pass打印机型：135cm超宽耐磨损送料皮带，最大105cm的印宽，更适合大尺寸的瓦楞纸板，以及木板、胶合板的批量打印。
Industrial one-pass printer model: 135cm extra-wide wear-resistant feed belt, max printing width to 105cm, more suitable for large-sized corrugated cardboard, as well as batch printing of wood and plywood.

数码直喷ONE-PASS打印机系列

Digital Direct Inkjet One-pass Printer Series

木浆棉打印机

Wood pulp printer

专业应用于木浆海绵和木浆棉抹布的彩色打印的机型，使用爱普生工业喷头，专业墨水固色持久，色彩鲜艳。

This machine is specially designed for color printing on wood pulp sponges and wood pulp cotton rags. It uses Epson industrial printheads and professional inks for long-lasting color fixation and vivid colors.

食品打印机

Food printer

专业应用于批量食品彩色打印，可定制打印模组和客户原有产线对接，广泛应用于饼干、棉花糖和威化纸批量打印。

Specialized in batch color printing of food, the printing module can be customized to connect with the customer's existing production line. It is widely used in batch printing of biscuits, marshmallows and wafer paper.

UV打印机

UV printer

应用于非纸类产品的彩色打印，例如覆膜杯片和纸袋，塑料袋，餐盒盖，PVC面板等产品，根据客户需求定制各种印宽。

It is used for color printing on non-paper products, such as laminated cups and paper bags, plastic bags, lunch box lids, PVC panels and other products. Various printing widths can be customized according to customer needs.
