Ceiling Fan lighting

We strive to be the leader in
the industry and the worlds most
respected lighting solution provider.

VACE Lighting

VACE Lighting adopts lean production management mode(JIT), introduces advanced automatic mechanical production equipment to improve the efficiency of production and managerment. With Motor workshop, Reciever workshops, SMT workshops, Hardware workshops and 20 Ceiling fan production assembly lines, there are more than 500 staff to reach the monthly productivity of more than 500 thousand units. VACE Lighting, with the attitude of pursuing perfection, strictly guarantees quality, and controls product through consistent process standard and rigorous process.

Vace lighting offer a variety of products including Decorative ceiling fans, Retractable ceiling fans and Fanderliers, solution for both indoor and outdoor application, and smart control like Matter and Tuya. Also accept customer design.With dedicated electronics and structural R&D teams, we oversee product appearance design from concept to mass production. Moreover, our laboratory is outfitted with testing equipment of DOE, noise, open-close tests, shaking tests, thermal tests, waterproof tests, EMC, RoHs and more.

With professional technical level and outstanding social responsibility, our company has successfully passed ISO9001 quality management system, ISO14001 quality management system, and obtained a number of domestic and foreign certifications such as CCC, SAA, CE, CB, UL, etc.

Both the production and product quality meet international standard, and our company is awarded the title of “Quality, Service, Integrity Model Enterprise In LED Industry”, and “Chinese Green Environmental Protection Product”.

Company Certiications

2015 ISO9001 Company Quality Certiication
2015 ISO9001 Company Environ-mental Certiication
Passed the supplier audit of Philips, Landvance and Opple

Daily output 80000 pcs
Everyday 3 containers shipout

800 workers
40 assembling lines

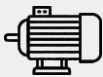

One-stop solution provider
85% key components made in house

Various products includes
residential, commercial,
retail & architectural lighting

DC BRUSHLESS MOTOR POWERFUL FORCE

Self-produced
Lighting and Cooling all in one

DC motor

DC motor stator modules are usually of brushless designed for longer lifetime

Thick copper wire

High reliability
DC motors are more stable and reliable in operation

Energy saving

Energy saving
Environmental friendly
Low carbon emissions

HOW TO FIND THE PERFECT FAN

IF MY ROOM SIZE IS LARGE

6m x 6m or more choose a

132cm fan or above

For rooms with ceiling heights that are higher than 3m, we recommend the use of an extension rod.

IF MY ROOM SIZE IS SMALL TO MEDIUM

4m x 5m or less choose a

122cm fan or above

For rooms with ceiling heights of 2.4m-2.5m we recommend our close to ceiling (CTC) fans.

CEILING FAN TIPS

SAVE MONEY, SAVE ENERGY

Ceiling fans keep you cooler in summer and warmer in winter using about as much power as a 20-watt light, which costs only 10per hour to run. Choose a fan with a DC motor, which uses 65% less energy than standard AC fans, and you'll reduce running costs to as little as 1c per hour.

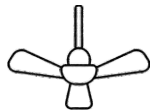

CEILING FANS IN SUMMER

While a ceiling fan does not necessarily lower the temperature, it makes the room feel cooler by providing a circulatory breeze. Effective circulation can make you feel up to 8 degrees cooler and reduce air conditioning bills by up to 40%.

CEILING FANS IN WINTER

In the winter, you should run your ceiling fan in the reverse mode as long as the ceiling height is below 3m. This pushes warm air up against the ceiling and then down the walls, gently re-circulatingwarm air through the room. This technique has been proven to lower heating costs by as much as 10%.

FAN SIZE RECOMMENDATIONS

Room Size		Fan Size	
Room Size	m ²	Inch	cm
75-144	7-13	36-42	91-106
145-225	13-21	48	122
225-400	21-37	50-56	127-142
Above 400	37	60	152

Large Rooms -Living, family or master bedrooms need a fan with a blade size of 132cm or larger to generate enough air flow. A small fan in a large room can make a space look unbalanced whereas a large fan can look overpowering in a small room.

Medium to Small rooms -For kitchens, dining rooms or kids bedrooms and offices you should choose a fan with a blade size of 122cm or smaller.

CEILING FAN LIGHT

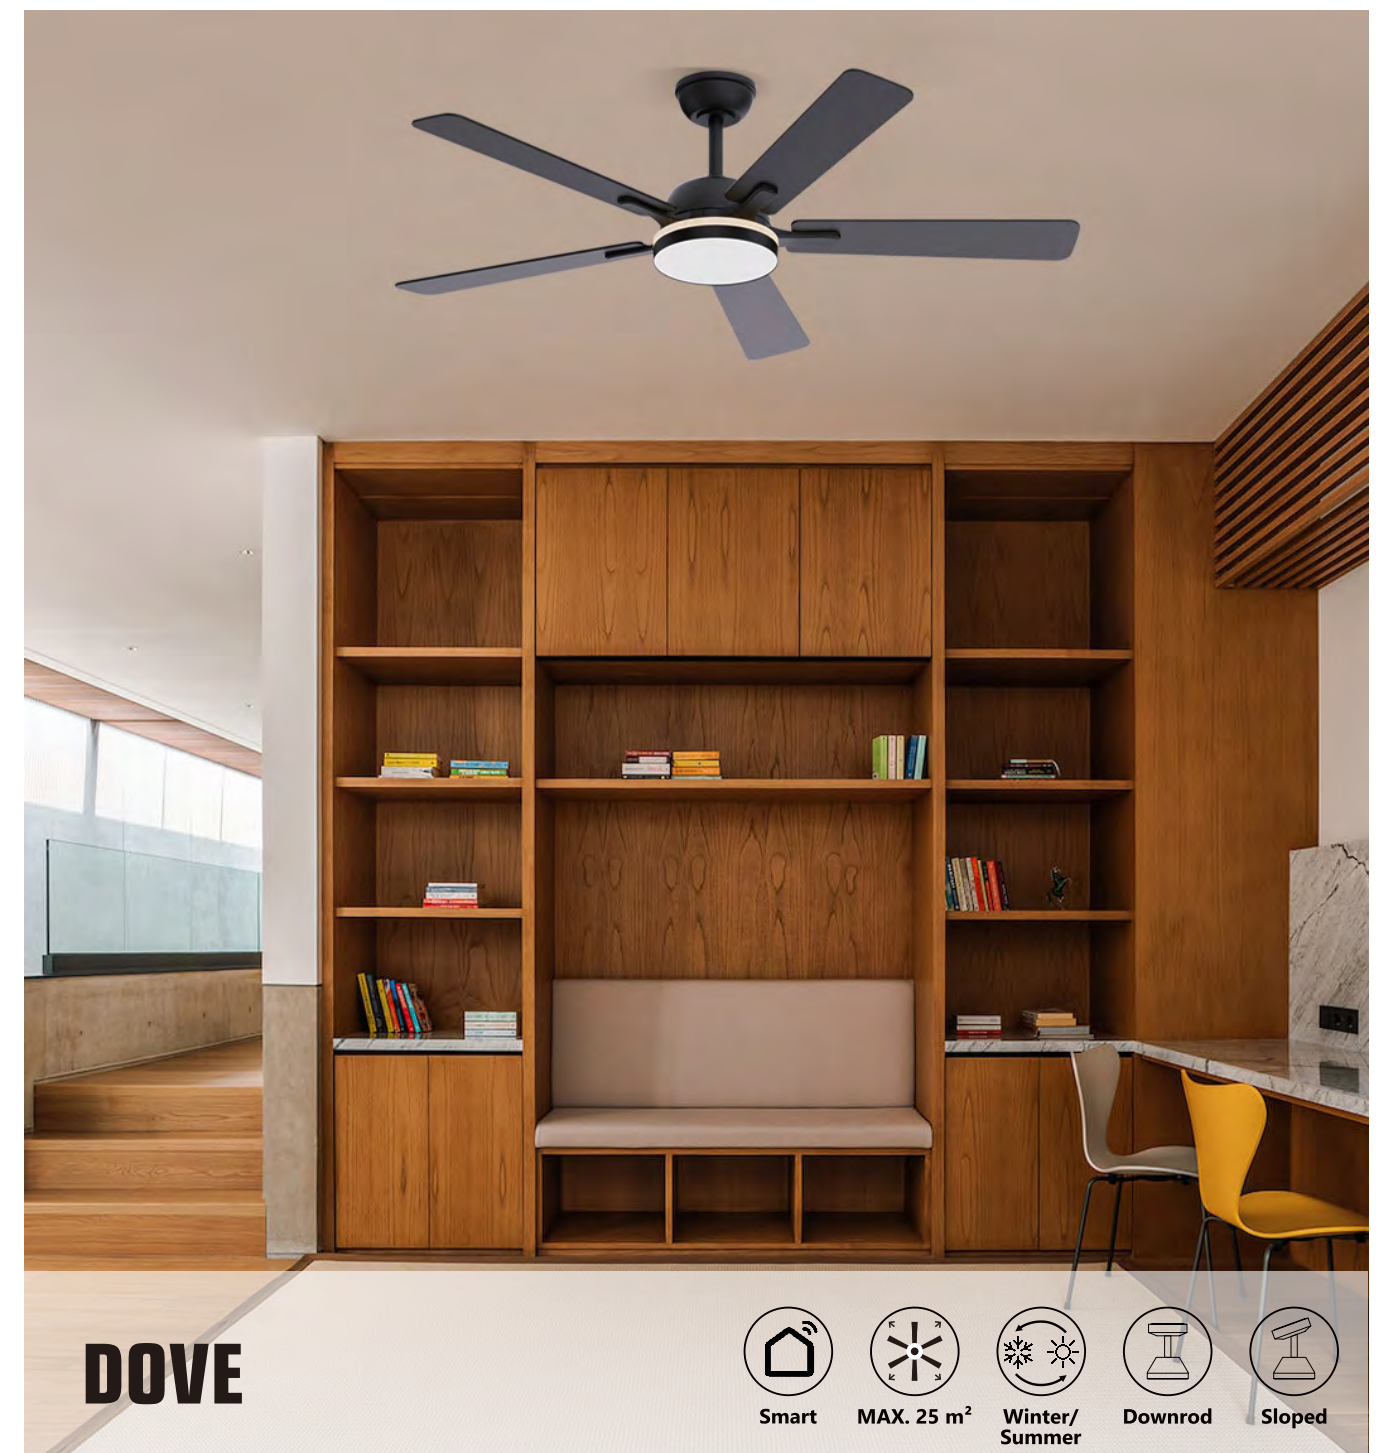

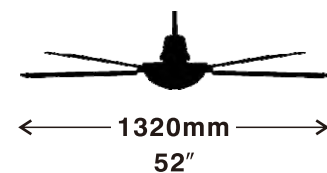

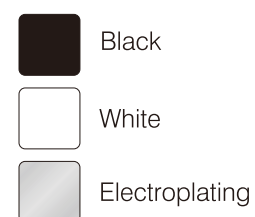

-Design: Ceiling fan lights come in a variety of stylish designs that complement any home decor. They are available in contemporary, traditional, and transitional styles to fit diverse interior themes.

-Advantages: These fans provide efficient lighting and powerful air circulation. They are energy-efficient, with features such as adjustable speed settings and remote control options.

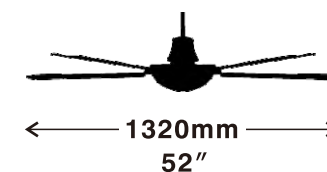

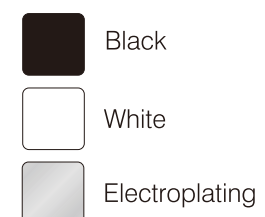

-Application: Ideal for living rooms, dining areas, and large spaces, these fans enhance both lighting and comfort. They are especially suitable for rooms with high ceilings.

RETRACTABLE FAN LIGHT

-Design: Retractable fan lights feature a sleek, modern design with blades that retract when not in use. This innovative design blends seamlessly with contemporary and minimalist decor.

-Advantages: They offer the dual benefits of a fan and light, with blades that extend for use and retract for a streamlined look. These fans often include smart features such as remote control and variable speed settings.

-Application: Perfect for contemporary homes, offices, and multi-purpose rooms, retractable fan lights are ideal for spaces where aesthetics and functionality are equally important. They are well-suited for rooms with limited ceiling height.

BEDROOM FAN LIGHT

-Design: Bedroom fan lights are designed to blend comfort with elegance, featuring styles that promote a serene environment. Soft colors and quiet designs are typical for a restful bedroom decor.

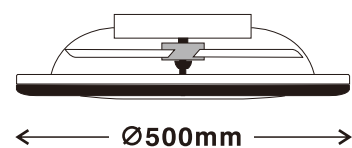

-Advantages: Ensure quiet operation and optimal airflow for a restful sleep. They often come with features like dimmable lights and remote control for added convenience.

-Application: Specifically designed for bedrooms and intimate spaces, these fans enhance comfort and aesthetics. They are perfect for small to medium-sized rooms, creating a tranquil atmosphere.
